

SNC roams while mobile on-site:

- connected to the network Always and securely
- · Can screen calls or take them · Phone calls can follow you around
  - Connection is uninterrupted while mobile

(secondary stationary locations) SNC is smart while in meetings · Can wirelessly connect to

VolP calls follow and allow for

presentations

privacy mode via headset or

handset

Silent Ring of phone calls

while awake or asleep

· Message indicator lights whil

Call screening awake or

asleep

awake or asleep

smart projectors (MS Mira) for

point to share limited wired · Can act as wireless access

connections

· Can dock/undock in any state and maintain network connection...from wired to wireless

SNC is a communications base station when deskbound:

- · VolP calls are taken via PC or VolP phone (PC enhances experience when connected)
  - Can act as wireless access point or "repeater" to fill in WLAN holes
    - Can act as VoIP/SIP wireless base station to wireless headsets/handsets

connected to the network via 802.11 hot spots, WWAN SNC automatically connects while on the road/at home: Always and securely

VolP phone calls can follow you around in this mode as (GPRS) or wired well
